Overview

The SP Diagnostics ACR4 is a dependable and reliable tool to enable you to carry out a huge range of functions on almost any marque of vehicle. The ACR has been in the market for over 15 years with over 12,000 units sold throughout the UK and Europe. The ACR4 pulls together improvements to offer a product which has been developed over the last 5 years to continually support the Independent and Franchise alike to provide a complete service to their customer.

SP Diagnostics specialise in providing more than standard diagnostics data from our products. We provide relevant OE level data which is presented in an easy to understand format with additional information and assistance where applicable. Service functions which are used day to day to increase your profitability by reducing the requirement to take vehicles to the dealer for specific service functions. Our new flagship product is the SPi, we have listened to the customers and enhanced the already successful ACR4 functionality to create a totally new product which gives even more coverage for the ever increasing models of vehicle.
